

US TAG UPDATE

www.solarworld.de

US TAG “UPDATE”

- TAG was “quiet” for a number of years
- Function and responsibilities of TAG Administrator is being transferred to Alex Mikonowicz
- IEC TC 82 work was not voted on in some instances
- Co-ordination between standards groups was infrequent or not accomplished

- What do we want from the US TAG?
 - Develop US position on all IEC documents
 - Assure that the US position is voted
 - Establish “expert” contact groups within each TC, E44.09, and NEC, UL, etc.
 - Keep TAG participants informed
- What are US PV Industry expectations of the US TAG and it’s newly appointed administrator?
- Need input to bring about a focus that meets the needs of the “stakeholders”.

US TAG Direction

- Determine “customers / stakeholders”
- Determine what “needs / desires” are
- Determine what can be accomplished
- Publish direction and intent
