

Update on The New PV Module Safety Standard UL61730

**Tim Zgonena
Underwriters Laboratories**

Standards Technical Panel, STP Meeting

- Worked through comments on UL61730 proposals.
- Took revised draft back to the IEC to address corrections and revisions
- IEC was receptive to proposals and fine tuned them further.

Moving Forward

- Merge revisions and corrections from both the UL STP and IEC meetings into the UL61730 ballot documents.
- Send UL61730-1 and UL61730-2 to STP for ballot early November.
-

ANSI Ballot

- 45 day ballot period
- Need >50% returned ballots and
- >2/3rds affirmative ballots
- Any negative ballots require recirculation to allow for ballot changes
- Address ballot comments.
- Establish effective date with industry input
- Publish UL61730-1 and UL61730-2
