
International Code Council

- International Building Code
- International Residential Code
- International Plumbing Code
- International Fire Code
- International Green Construction Code (new)

International Building Code

- New provision:
- Rooftop mounted photovoltaic systems shall have the same fire classification as the roof assembly as defined required by Section 1505.
- Same language in International Residential Code

International Fire Code

- Adopts provisions similar to the CalFire Solar PV Installation Guideline
- Residential - 3 foot access pathways
- Non-residential – 4-6 foot clear perimeter
- Other requirements.

Solar ABCs Plan

- Establish a Stakeholder Working Group
- Hire an I-Code Coordinator/Facilitator
- Work with SEIA
